

MAGNUM DYNALAB

HIGH END SHOW, MAY 2016, MUNICH

Magnum Dynalab was happy to exhibit at the High End Show in Munich for it's 35th year. It was great to see excitement over the new **DYNAMYTE** series, as well as admiration over our existing portfolio of integrated amps, tuners and receivers. Thanks to all audiophiles who came out to support Magnum Dynalab, exclaiming their love of our products and the listening experience they provide.

MAKE WAY FOR THE DYNAMYTE

Magnum Dynalab is pleased to announce the exciting DYNAMYTE series of diminutive components. These stylish, modern components are compact without sacrificing the quality of sound expected from our products. We introduce our TRACC audio section from our 109T, MD108T and 809 into our pre/headphone amp, Music Audio Streamer and DAC/HD USB. All units feature a high definition 5" TFT LCD touchscreen display. The Dynamyte Music Engine and the Music Audio Streamer are the most up to date HD Streamers available. Pre-loaded for Roon, Tidal, Spotify, Deezer Streaming software and loaded with VTuner for Internet radio and podcasts. Fully controllable with IOS, Android phones and tablets with digital volume, dual wifi, multi zone control and album artwork. They play any music format and will glean music from multiple storage devices or cloud storage.

Featured in the series are the Pre/headphone amp, Music Engine, Music Audio Streamer, HD USB DAC, Analog tuner And DAB + tuners. A 50watt per channel power amp and phono pre will be later additions!

Dynamyte Prototypes on display in Munich, May 2016:

Watch the site for updated info with shipping expected in the 3rd and 4th quarter of 2016, or contact us to pre order now

HAVE AN OLDER PRODUCT THAT NEEDS UPDATING

It is our goal to serve our customers for the long term. We still service our original FT101 tuners we introduced in 1985 and if you still have one we will take it on trade against any of our current line. We pride ourselves on not letting our products go obsolete without offering an upgrade or trade-in path
